

**Amendments to the Claims:**

This listing of claims replaces all prior versions, and listings, of claims in the above-referenced application.

**Listing of Claims:**

1. (Previously Presented) A method of processing messages received by user equipment (UE) from a network, the method comprising:

receiving a message at the UE that indicates that the UE should be in a dedicated channel state, wherein the message is one of the following: a Cell Update Confirm message or a URA Update Confirm message or a RRC Connection setup message; [[and]]

in response to the message, clearing from the UE any record of a cell identifier; and optionally sending a response message receivable by the network, after the UE is cleared of any record of a cell identifier.

2. (Original) A method according to claim 1 wherein the dedicated channel is a Cell\_DCH channel.

3. (Canceled)

4. (Original) A method according to claim 1 wherein the cell identifier is a Cell Radio Network Temporary Identifier.

5. (Canceled)

6. (Previously Presented) A method according to claim 1, 2, or 4, wherein when the message is a message that indicates that the UE should move into a dedicated channel state, the method further comprises clearing from the UE any record of a cell identifier before moving to the dedicated channel state.

7. (previously amended) A method according to claim 1 wherein when the message includes a new cell identifier, the method further comprises, in response to the message, not storing in the UE any record of the cell identifier included in the message.

8. (Currently amended) Apparatus for processing messages received by user equipment (UE) from a network, the apparatus comprising elements capable of:

receiving a message at the UE that indicates that the apparatus should be in a dedicated channel state, wherein the message is one of the following: a Cell Update Confirm message, a URA Confirm Update message or a RRC Connection setup message; and

in response to the message, clearing from the apparatus any record of a cell identifier; and optionally sending a response message receivable by the network.

9. (Original) Apparatus according to claim 8 wherein the dedicated channel is a Cell\_DCH channel.

10. (Canceled)

11. (Original) Apparatus according to claim 8 wherein the cell identifier is a Cell Radio Network Temporary Identifier.

12. (Canceled)

13. (Previously Presented) Apparatus according to claims 8, 9 or 11 wherein the apparatus is further arranged, on receipt of a message that indicates that the apparatus should move into a dedicated channel state, to clear from the apparatus any record of a cell identifier before moving to the dedicated channel state.

14. (Original) Apparatus according to claim 8 wherein the apparatus is further arranged, on receipt of a message that includes a new cell identifier, not to store in the apparatus any record of the cell identifier included in the message.

15. (Original) A mobile telecommunication device incorporating apparatus according to claim 8.
